PROFESSIONAL SUMMARY

Computer Science undergraduate and DevOps & Cloud Engineer Intern with hands-on AWS hosting, Docker/Linux deployment, Kubernetes manifests and GitHub Actions experience. Builds Python AI applications and documents infrastructure troubleshooting. Seeking junior Cloud/DevOps opportunities.

SKILLS

Cloud: AWS EC2, S3, CloudFront/OAC, ECR; ALB/Auto Scaling, RDS and CloudWatch/SNS labs.

Delivery: Docker, Linux/Bash, Kubernetes Deployments/Services, GitHub Actions, Git, Trivy; foundational Terraform.

Development & AI: Python, JavaScript/TypeScript, FastAPI, React, PostgreSQL, Streamlit, Gemini and retrieval-augmented generation.

CLOUD & DEVOPS PROJECTS

AWS Portfolio & Serverless Contact | Deployed portfolio

- Built private-origin S3/CloudFront portfolio hosting and integrated an API Gateway contact form with a documented Lambda/SES backend.

Container delivery on AWS | CI/CD lab

- Built a GitHub Actions Docker build/Trivy-report/ECR-push pipeline with commit-SHA image tags and a non-root Nginx container.

Kubernetes Application Orchestration | Hands-on lab

- Defined a three-replica Nginx Deployment, CPU/memory requests and limits, and a label-selected NodePort Service in Kubernetes manifests.

Dockerized Application on EC2 | Documented deployment lab

- Containerized a restaurant site with Nginx on EC2 Ubuntu; automated rebuild/restart with Bash and resolved a host-port conflict.

NovaMart Multi-Agent RAG | Private implementation

- Built Python agent orchestration with Bedrock/Strands, policy retrieval and DynamoDB/Lambda workflow tools; added tracing and Guardrail hooks.

AI ENGINEERING PROJECTS

Digital Twin AI | Streamlit demo

- Built semantic retrieval and Gemini PDF chat with source references, custom embedding/search components and automated core-functionality tests.

ETIKU AI | Streamlit demo

- Built a Streamlit Gemini assistant with streaming responses, configurable response styles and conversation search, rename and delete controls.

EXPERIENCE

DevOps & Cloud Engineer Intern | 2026 - Present

Build and Ship Academy Ltd | Remote

- Build AWS hosting, container deployment and delivery-automation projects using Linux, Docker and GitHub Actions.
- Document infrastructure configuration, deployment troubleshooting and cloud operations labs.

Cloud Engineering Trainee | November 2025 - February 2026

Schull Technologies, Lagos

- Completed practical training in AWS infrastructure, access management and application hosting.

Student Mentor / Community Volunteer | January 2026 - April 2026

Miva Buddy Programme, Miva Open University | Remote

- Supported student onboarding and peer collaboration.

EDUCATION

B.Sc. Computer Science | Miva Open University

Expected graduation: 2027
